Formula For Quality factor = (R*0.1+Q*10+E+F*1.5+P+O)*(100-O)/100

R- Average number of words in an article, Q- Avg. size of article (KB), E- Article greater than 2kb, F- Article greater than 0.5kb, P- Total Edits/article, O- Mainspace edit per total nr. Of articles, N- Share of Bot edits (%)

Formula For Overall ranking = Nr. Of articles * Quality factor
